Bupropion Sustained released versus Placebo for seasonal affective Disorder

Published On: May 26, 2017 | Pages: 009 - 013

Author(s): Martin H Teicher*, Danielle M Webster and Steven B Lowen

Background: The majority of seasonal affective disorder (SAD) studies have evaluated the use of light or selective serotonin reuptake inhibitors (SSRI). The purpose of the present study was to evaluate bupropion sustained-released

(SR), a non-SSRI antidepressant, for the treatment of SAD. ...
