The role of depressive symptoms in successful aging in older adults

Published On: March 25, 2021 | Pages: 012 - 016

Author(s): Neyda Ma Mendoza-Ruvalcaba* and Elva Dolores Arias-Merino

Background: Depressive symptomatology is a prevalent and disabling condition in older adults, considered as a public health problem due to its devastating consequences reducing the chances to successfully age. The objective of this study is to analyze the role of depressive symptomatology as risk factor for successful aging in older adults. Methods: Cross-sectional s ...

Maladaptive stress: Theoretical, neurobiological and clinical profiles

Published On: January 11, 2021 | Pages: 001 - 007

Author(s): Giulio Perrotta*

Stress is an adaptive response of the organism to an event that can be both internal and external, interfering at the endocrine, humoral, organic and biological levels: If the person reacts with all his resources, in a constructive and functional way, then we speak of "eustress", responding in an adaptive and functional way; if, on the other hand, the person fails to ...

The intergenerational effect of mother's depression on their young adult children's depression

Published On: February 23, 2021 | Pages: 008 - 009

Author(s): Jaewon Lee* and Jennifer Allen

Women are often more likely to report mental health problems such as depression compared to men [1,2]. As individuals age, people with children are more likely to be depressed [3]. Therefore, mothers are at particularly high risk for depression, and their depression negatively influences their children's development [4,5]. Even though it is important to take into acco ...

Depression

Published On: March 19, 2021 | Pages: 010 - 011

Author(s): Bernard Brusset*

In psychiatry, only descriptive semiology (DSM), and the effect of suggestion of naive clinical investigation that can result

from it, leads to the proliferation of diagnoses in terms of" mono or bipolar of different types. They justify the prescription. of antidepressant treatment aimed at eliminating disabling symptoms, sometimes without any other form of psychopath ...
