Understanding and addressing smartphone addiction: A multidisciplinary perspective

Published On: September 16, 2023 | Pages: 001 - 004

Author(s): Yanxia zhu, Jun Chen and Enming Zhang*

The present study investigates the escalating dependency on smartphones, with tendencies toward severe addiction, thereby causing detrimental effects on both psychological and physiological well-being. The group addicted to mobile phones exhibits behavioral and neurophysiological differences compared to the non-addicted group. Non-invasive neural modulation techniques ...
