Ketamine; A better anti-depressant? An animal study evaluating the efficacy of citalopram, ketamine and their combination in animal models of depression

Published On: April 06, 2021 | Pages: 019 - 023

Author(s): Salim Sheikh, Pankaj Sonone, Veena Verma, Chakar Dhar Tripathi, Bushra Ahmed Karim* and Girish Gulab Meshram

Background: Despite the availability of vast group of drugs, treatment of depression still remains unsatisfactory, largely due to differential efficacy of antidepressants at adequate doses resulting in treatment refractive depression. In addition, serious adverse effects of anti-depressants also lead to early withdrawal from treatment. One more important concern is th ...

The state of consciousness: From perceptual alterations to dissociative forms.

Analysis of neurobiological and clinical profiles

Published On: March 15, 2021 | Pages: 006 - 018

Author(s): Giulio Perrotta*

Consciousness, understood as the state of vigilance of the mind or the state of being conscious and present with respect to ourselves and the surrounding environment, allows us to interact at every level, unless there is a precise cause capable of interfering with and altering the functional state of our consciousness. This paper investigates the main hypotheses of al ...
